# **SITUATION SUMMARY**

## **2016-SREOC-24549, City of Bishop, Inyo County**

A conference call with Southern Region, DWR and Inyo County was conducted today based on Inyo County's request for state assistance in the form of a consulting Hydrologist to help them form an action plan to mitigate minor, widespread flooding in the west side of Bishop.

Approximately 100 homes have saturated soils due to the water table and there is some sporadic overflow in ponds and irrigation ditches.

- Liz Bryson from the DWR Flood Operations Center and her staff asked several technical questions to get a better awareness of which DWR staff should be detailed via a mission tasking to assist the County. They indicated they should be able to provide appropriate staff.
- The County has a current drought Proclamation of Local Emergency and may amend their current proclamation to include the current emergency, pending the next meeting of the Board of Supervisors.

## **Power Outage, San Fernando Valley, Los Angeles County**

On 06/23/16 at 1240 hours the California State Warning Center (CSWC) received a report indicating that a power outage had occurred in the San Fernando Valley in Los Angeles County.

Per Los Angeles County Department of Water and Power (LADWP):

- A crow flew into a circuit breaker, causing the breaker to blow up.
- The affected areas include Studio City, Valley Village and North Hollywood.
- Crews are moving a large remote electric transformer called a 'hog wagon' into the area to use, if needed, to help restore power.

The California Utilities Emergency Association (CUEA) is monitoring the situation and providing updates as they become available.

- As of 1900 hours on 06/23/16: Approximately 11,000 customers have been restored and 4,200 still remain without power.
- ETR for restoration is: 06/23/16 at 1900 hours.
- Per the LADWP Outage Website as of 0702 hours on 06/24/16:
  - Approximately 3 customers are still without power.

# WEATHER OF CONCERN

## Weather of Concern

- A Red Flag Warning is in effect until Saturday morning for the mountains of Los Angeles, Ventura and Santa Barbara counties.

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php)

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

The low pressure trough associated with the low is currently moving through the North California region and will be to our east later today. Light to moderate northwest to north winds are developing behind the trough. The winds will continue all day at about 10-15 mph with gusts to 25 mph, primarily in the northern and western Sacramento Valley and nearby foothills. This event is considered to be at the low end of a High Risk for Significant Fire Potential. Temperatures will be near normal and humidity will drop into the middle teens in the warmest inland areas. From Saturday through much of next week strong high pressure over the Desert southwest will be the main influence on Northern California weather. Temperatures will be 5-10 degrees above normal and humidity will drop to 7-15% each afternoon. Diurnal slope winds will prevail in inland areas - light downslope during nights and mornings and light to moderate upslope in afternoons. Overnight humidity recovery will also be poor in many inland areas (less than 40%). Thunderstorms may reach as far north as the Central Sierra beginning Wednesday, but none are expected to reach the North California region through the end of next week.

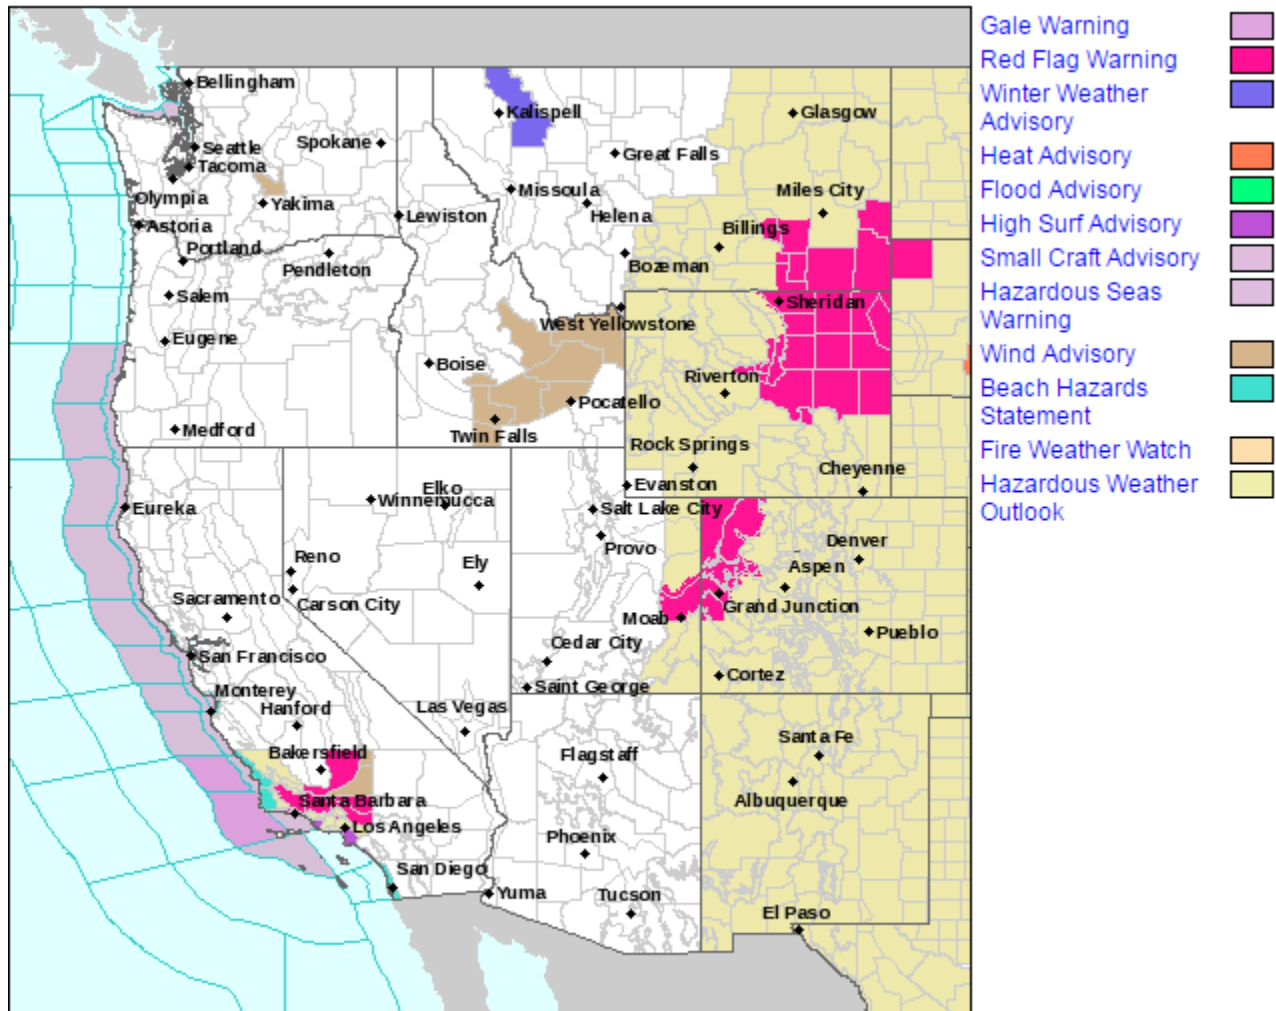

## **SOUTHERN CALIFORNIA**

Northwest to north winds of 20 to 35 mph with gusts to 50 mph will surface across the mountains of Kern, Santa Barbara, Ventura, and Los Angeles Counties through early Saturday morning as a storm moves into Montana from Washington. High pressure will strengthen over the Southern half of the United States bringing a warming trend to the region through Monday. Maximum temperatures will be in the upper 70s and 80s across the mountains and 90s in the valleys today. Widespread triple digit heat will occur across the valleys and foothills Sunday and Monday. Minimum humidity will be mainly in the single digits and teens away from the coastal areas through Monday. The high pressure will weaken slowly Tuesday through the end of next week bringing a gradual cooling trend and a little increase in humidity to the region. Southeast to south flow aloft may bring isolated afternoon thunderstorms to the Sierra and to the mountains and deserts of Southern California east of the Cajon Pass Tuesday through the end of next week. Winds will be fairly light across most of the region Saturday afternoon through the end of next week, except there will be strong and erratic winds in and near any thunderstorms if they develop.
